iHire Software ®

S01	خدمـات تركـيب وإعـداد البـرامج
	Installation & Configuration Services

The iHire System consists of a number of modules each specializing in one aspect of the Rental business and all modules are integrated to process all aspects of Rental and sales.

The iHire Software team will install and configure the complete iHire software modules on the client's servers and machines.

The installation process will only start once the servers and other software and hardware infrastructures including the networking infrastructure have been set up.
